

# Wellness Center Biologist

You will be viewing slides today to solve two health cases. Be extremely careful when handling the slides. These are very fragile and must be treated as such. When lunch breaks begin, you will also help the Physician Assistant with the sales for the Wellness Center. Assist each customer in a friendly and courteous manner.

## 1. Read the Biologist Workbook

## 2. Review the Microscope Operation

Read about the microscope operation in the Biologist Manual.

## 3. Review the Data Information Sheet

You will be doing an assessment of certain slides and then solving two health cases.

## 4. Make Stress Balls

Before starting your research, make 30 stress ball/balloons to sell for the day in your business. The supplies will be in your business on the back counter. These are very popular items and should be **sold for \$4.00** or more (let your CEO know this).

## 5. Begin Research and Assessments

When you are done making the stress balls/balloons, follow the directions in your Biologist Manual to begin your research and assessments.

- Fill out the Data Information Sheet as you work.
- When you have completed the Data Information Sheet, give it to a JA staff person.

## 6. Assist the Physician Assistant

When you are finished with the Data Information Sheet, you will assist the Physician Assistant with the merchandise sales in the Wellness Center.

- Make sure you know what is being sold, prices of the items and how to use the POS iPad. The Physician Assistant will be happy to show you.
- When the citizens are on break, they can come into the Wellness Center, show their blue insurance card, and get a free eye, height, and weight exam. Assist with this.

## 7. Clean Up

Assist with business clean up at the end of the day.
